

The Security Gates at the front entrance are open during day light hours to permit golfers to enter.

The gates open at approximately six (6:00) o'clock AM year around. The gates close at approximately six (6:00) o'clock PM, during the winter months, and approximately eight (8:00) o'clock PM during summer months.

Each resident is issued two automatic gate openers; purchasers of a home should have received their gate openers from the previous owner. Replacement gate openers are available for twenty five dollars (\$25.00).

There are two ways to open the gates without a gate opener: (1) enter * plus the code given on your recent dues statement, (2) scroll down the menu in the box at the gate to the name of the resident you wish to give you access and press the Enter key. The resident's phone will ring and you can speak to them through the box. Access can be granted by the resident pushing the number six (6) on their home phone and the gates will open.

Never attempt to force the gates open. The Hydraulic Cylinders that control the gates cost over \$1,800 each.

The front entrance is also monitored twenty hours a day by six (6) security cameras, which hold data for approximately three (3) weeks and are reviewed periodically.
